## **Seal for Life Industries is proud to be the Huntsville Hospital Foundation's newest Business Cares partner!**

**Monday October 25, 2021 Huntsville Ontario:** Seal for Life Industries is pleased to announce they are the most recent partner to join the Huntsville Hospital Foundation's Business Cares Program. They have joined the Business Cares initiative because their donation is an investment in our community which will help improve healthcare for all residents.

Seal for Life (SFL) and its associated companies manufacture multiple coating technologies focused on corrosion, fire & temperature protection, and cathodic protection for energy, water, renewables, infrastructure, flooring and preservation applications. The SFL Canusa brand is a global leader in the development and manufacturing of specialty pipeline coatings for the sealing and corrosion protection of pipeline joints and other substrates. The primary manufacturing site for the SFL Canusa brand is the Huntsville location at 455 West Airport Road, which has been in operation since 1967. SFL Canusa also has a global distribution center in Burk's Falls. Both SFL Canusa locations serve international markets and customers either through direct sales or through our worldwide distribution channels. SFL Canusa employs 125 Team Members involved in both production and office activities, including operations, engineering, procurement and maintenance.

Plant Manager Matt Cook told the Foundation, "The Team at Seal for Life are excited to become the 55th local Business that supports the Huntsville Hospital Foundation through the Business Cares Program. The Seal for Life Team is passionate about the community and assisting where we can. We know our local hospital depends on the generosity of donors so they can continue to support the health and wellbeing of our community. Maintaining infrastructure, facility upgrades and improvement program initiatives require large financial investments. Those funds are not always available, so they rely on the generosity of the community. Our families depend on the work and care they provide, and they depend on us. It is our responsibility to help, and we are proud to be a part of its future through the Business Care Program."

Katherine Craine explained, "We are very grateful to have Seal for Life join our Business Cares Program and I'm sure their 125 team members are happy too!" We have found that employees find it rewarding to be working for a company that understands the importance of the health of their community. Thanks to everyone at Seal for Life for your care!"

Huntsville Hospital Foundation in partnership with their Business Cares Committee officially launched their new "Business Cares" initiative in January 2016 with the goal of enrolling forty businesses in the community. They are very happy to report that they have surpassed their goal. Their plan is to continue with this successful imitative, as they have many businesses expressing interest in joining the Business Cares community. Since its inception, fifty five local businesses have committed to donating \$25,000 or more over the next five years for Healthcare for life, here.

Pat Dube Committee Chair, is joined by Committee Members Chantelle Armstrong, Katherine Craine, Mike Harrower and Trish Kruusmagi who are very active in pursuing new Business Cares Partners, and exploring more, much needed support for Huntsville Hospital.

Pat Dube sends this message: “The ability of a community to invest in its own health and future for our neighbours, our families and everyone who visits here is evident in the support of local business leaders. I’m sure you share my profound gratitude to them all. We’re great when we work together – that’s Business Cares.”

Huntsville Hospital Foundation is a fundraising organization dedicated to improving healthcare services for residents of Muskoka and East Parry Sound. A registered charity since 1984, its mandate is to provide ongoing capital and education resources for Huntsville District Memorial Hospital. This will ensure our hospital and medical professionals have the technology and equipment they require to provide exceptional care.
