*more than two hospitals,
more than new acute care beds
serving every community
in and around Muskoka
4,000 square kilometers, from
60,000+ to 3.2 million people
the sum of our parts
and partnerships
attracting and retaining talent
building green, like the unique
environment we cherish*

Introducing **Made-in-Muskoka Healthcare**

From north of Burk's Falls down through Huntsville and Baysville to Bala, Bracebridge, Gravenhurst and beyond, we live and play in a truly remarkable region. We are unique - not only in our natural landscape and vibrant communities, but in how we have come together to rethink local hospital care and meet the challenge of our times. Many have been heard: from locals to cottagers, our business leaders, healthcare workers here at the hospital and other healthcare providers that serve this region. The Ministry of Health has moved our two-hospital site model forward; in large part because it is a masterwork in listening, and in reflecting what is required to provide healthcare here for generations to come. Our proposal is for everyone here by everyone here. ***Our Vision is Made-in-Muskoka Healthcare.***

A MESSAGE FROM MUSKOKA ALGONQUIN HEALTHCARE LEADERSHIP

On behalf of our team, our Board and our Foundations, I want to thank everyone for their contribution to Made-in-Muskoka Healthcare. Specifically, I want to thank our community leaders and elected officials for their support. With one voice, they have demonstrated their understanding of healthcare's role in their individual communities and importance throughout Muskoka and area. They understand that business-as-usual is not the destination - that building a system of healthcare is about more than two new hospital sites. They have asked great questions and the answers to those questions have made our plans stronger. Now it's time to continue this momentum to the next stage - detailed services plans, ongoing Ministry approvals, and getting shovels in the ground. We're looking forward to the continued support - and questions - as we embark on this journey together.

WHAT WE'RE BUILDING FOR MUSKOKA AND SURROUNDING AREAS

Healthcare and hospitals everywhere in Ontario are under pressure to transform. To be sustainable. To rethink access and service delivery. To be more adaptive and collaborative. That pressure, complicated by our unique blend of communities, shifting populations and even lifestyles, is acute here in Muskoka and the small towns inside and around its borders. And that is exactly why we've created Made-in-Muskoka Healthcare: Reaffirming local healthcare, preserving the best of what works today, and enhancing it with an integrated system based on collaboration, advanced technology and a world-class approach to healthcare partnership.

Made-in-Muskoka Healthcare will start and be anchored by two, new, state-of-the-art hospitals that will ensure we serve all communities and constituents in and around Muskoka with safe, reliable access. We will design for continuous

change from the ground up, we will build green, we will be home to the practice of outstanding medicine for all.

As partners in the education of a new generation of healthcare providers, Made-in-Muskoka Healthcare will attract and retain great talent. We will join and always support partnerships that foster integration and improve all forms of local healthcare over time. We will be colleagues in wrap-around healthcare. From day one, we will blend advanced technology and genuine collaboration to sustain and support the very best of personalized care. This will ensure that patient compassion thrives here.

Made-in-Muskoka Healthcare goes beyond two new hospitals. It is the sum of our amazing parts and partnerships. It will be a unique healthcare infrastructure that matches our unique part of the world for generations to come.
